Key Takeaways

£899.9M revenue at 36.9% margin: The business recovered strongly from pandemic disruption; the priority now is protecting profitability as conditions normalise.

2021 revenue +294%: Much of the growth reflects the post-2020 rebound, so management should focus on converting recovery-driven demand into sustainable growth rather than extrapolating the rate.

West: £269.9M revenue, 33.2% margin: The largest revenue region is also the weakest on margin, making **product and channel mix** the immediate area for subsequent investigation.

Recommendations & Actions

- 1. Convert rebound demand into retention**
Why: Recovery-driven demand will normalise.
How: Use digital engagement, loyalty and repeat-purchase strategies to retain customers.
- 2. Shift from volume → value**
Why: Exceptional post-pandemic volume growth is unlikely to repeat.
How: Track margin, repeat purchasing, revenue per customer and channel productivity alongside revenue.
- 3. Build a resilient growth engine**
Why: A recovery spike is not a long-term strategy.
How: Use 2021 as the foundation and build consistent growth through retention, product mix and channel efficiency.
